PROFESSIONAL SUMMARY

Associate Software Engineer with 1+ year of professional experience building and shipping production full-stack web applications with Java 17, Spring Boot, React and Next.js. Delivered three live business systems end to end, from database design and REST APIs through authentication, payment integration and Linux VPS deployment, including a tuition platform serving 700+ tutors with live card payments. Currently lead developer on a multi-tenant SaaS POS platform with 87.6% backend test coverage.

TECHNICAL SKILLS

Languages: Java 17, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST API design, Node.js (Next.js API routes), Maven
Frontend: React, Next.js (App Router), Vite, Tailwind CSS, TanStack Query, React Hook Form, Zod
Databases: MySQL, PostgreSQL, Prisma ORM, Flyway migrations, relational schema design
Security & Testing: JWT, OAuth 2.0 (Google Sign-In), BCrypt, role-based access control (RBAC); JUnit 5, Mockito, JaCoCo
Integrations: PayHere and OnePay payment gateways
DevOps & Tools: Linux (Ubuntu) VPS, Nginx, CI/CD, Cloudflare, Git, GitHub, Postman, AI-assisted development (Claude Code)

PROFESSIONAL EXPERIENCE

Ultimate Digital Solutions (Pvt) Ltd | Panadura, Sri Lanka

Associate Software Engineer **Apr 2026 – Present**

UDS POS – Multi-Tenant SaaS Point of Sale & Inventory Platform (in development)
Tech: *Java 17, Spring Boot, Spring Security, PostgreSQL 16, Flyway, Next.js, React 19, TypeScript, CI/CD, JUnit 5, Mockito*

- Lead developer on a multi-tenant, multi-branch POS and inventory system for retail and spare-parts businesses, covering the super admin dashboard, POS till and a 13-screen shop owner dashboard.
- Designed a PostgreSQL schema (40 Flyway migrations) with tenant- and branch-level data isolation, batch tracking, stock transfers and audit logging; applied pessimistic locking to prevent race conditions on concurrent stock and sales updates.
- Cut database round trips on critical endpoints from 34 to 10 (~70%) by eliminating N+1 query patterns.
- Built 23 REST controllers and JWT authentication with token versioning for instant session revocation; wrote 630 unit and integration tests (JUnit 5, Mockito) reaching 87.6% backend coverage.

UDS LMS – Learning Management & E-Learning Platform (live at lms.uds.lk)
Tech: *Java 17, Spring Boot, Spring Security, MySQL, React 19, Vite, Tailwind CSS, PayHere*

- Built and deployed the platform end to end as sole developer, with Student, Tutor and Admin roles covering courses, quizzes, progress tracking, certification and payments.
- Designed a 28-entity MySQL schema; built JWT authentication with email OTP verification and Google OAuth 2.0 sign-in.
- Integrated PayHere for live enrolment payments, built QR-verifiable PDF certificates (Apache PDFBox, ZXing), and deployed to a Linux VPS with Nginx and systemd.

Software Engineer Intern **Sep 2025 – Mar 2026**

iClazz Education – Tuition Class Management Platform (live at iclazzeducation.com)
Tech: *React 18, Tailwind CSS, Spring Boot, Spring Security, MySQL, JWT, Google OAuth 2.0, OnePay, Hostinger VPS, Cloudflare*

- Designed, built and deployed a production tuition platform from scratch, now serving 700+ tutors and 1,000+ students across four role-based dashboards (Student, Tutor, Coordinator, Director).
- Built 17 REST controllers (150+ endpoints) over a 31-entity MySQL schema covering the full class lifecycle: requests, tutor assignment, scheduling, attendance and monthly billing.
- Integrated OnePay subscription billing with SHA-256 hash verification, server-to-server callbacks, saved cards and recurring payments; live payments have run in production for 8+ months.
- Migrated payments from PayHere to OnePay without disrupting active billing cycles, and automated billing cycles, grace-period penalties and auto-pay retries with four Spring Scheduler jobs.

Royal Weddings – Multi-Vendor Wedding Services Marketplace (live at royalweddings.lk)
Tech: *Next.js 16 (App Router), React 19, TypeScript, Prisma ORM, MySQL 8, NextAuth.js, Tailwind CSS, Zustand, PayHere*

- Built a multi-vendor marketplace as lead developer, onboarding 50+ real vendors across four access levels.
- Designed an 18-table schema with Prisma and built Next.js API routes with search, filtering and pagination; integrated PayHere vendor subscriptions with webhook validation; provisioned the production VPS with Nginx and PM2.

EDUCATION

BSc (Hons) Computer Science (Software Engineering) – Second Class Honours, Upper Division (2:1) **2024 – 2025**
University of Wolverhampton, UK (delivered at CINEC Campus, Sri Lanka)

Pearson BTEC Level 5 HND in Computing (Software Engineering)
CINEC Campus, Sri Lanka **2022 – 2024**
